

A Special Anode Centralizer

for

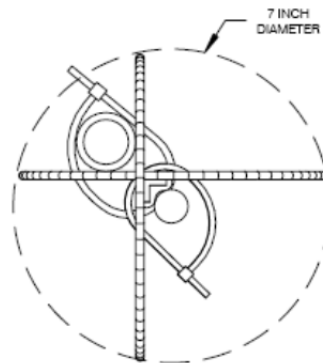

MMO Tubular Anodes

Optimized Ventrolizer Technology

This universal MMO centralizer design is simple but very effective. It is ideal for all types of MMO anodes. If improper centralizer technology is used with MMO anodes the anode life can be compromised. This centralizer is equipped with rubber bumpers to assure that the MMO anode's advertised life is not compromised. This Centralizer is also a Ventrolizer. It optimally orients the anode in the hole and optimally orients the anode in relation to the vent pipe using strong tie wraps supplied with unit.

Two sizes are available. One has an actual diameter of 7 inches and the other actual diameter size of 5 inches.

Part No. VENT-1000 For 7" Φ
Part No. VENT-1003 For 5" Φ

Maintains Anode Life

Maintains Anode Orientation in Coke Column

Maintains Anode to Vent Pipe Orientation

Locks Anode and Vent Pipe into One Assembly

Easy to Install
